

INTRODUCING APS PRIVATE CLOUD

Control and manage your practice - anytime, anywhere.

All you need is an internet connection to access our fully integrated Advance software suite in the APS Private Cloud.

The APS Private Cloud provides an on-demand IT infrastructure comprising servers, storage, backups, and software applications, all managed by APS and delivered via the internet.

The benefits are clear;

- **24/7 access:** The Advance suite, existing applications and data are accessible from anywhere at any time.
- **Mobile:** Access via mobile devices, tablets, laptops and PCs so you can manage your practice on the go.
- **Secure:** Data is backed up in managed, secure, purpose built data centres.
- **Efficient:** Software and application upgrades are managed for you off-site.
- **Cost effective:** IT complexity and costs are significantly reduced.

Add to these benefits the overall APS experience; a relationship based engagement with a team of experts who are committed to delivering accountable technology and great client outcomes.

Explore the opportunities with APS in the Cloud.
