

Divine integration is here.

Genuine software integration: all your data, now within easy reach.

For years now, accountants have been asking for truly integrated practice software that works seamlessly off a single platform in the Microsoft Windows environment. But there has been one big problem – the ideal was ahead of the technology. Until now.

The Advance software suite – no more juggling with different products & platforms.

At APS we've been busy and now we can offer you the holy grail of practice software – a totally integrated practice software suite, all built on a Microsoft SQL platform. With the Advance suite, your firm can access all your practice software applications and all your practice and client data via a single desktop window.

Now, lay your hands on all of your information at once.

So imagine a world where, via that

single desktop window, you and your team can get to everything you need - Practice Management (PM), Reporting (PIQ), Document & Email Management (DM), Taxation (Tax), Client Accounting (XPA), Client Relationship Management (CRM), Resource Planning (RP), Superannuation (DS), Corporate Secretarial (ACR), Workpaper Management (WM) and more, as well as your Intranet and Extranet capabilities. All the tools and all the data to help you service your clients in a time efficient manner – and all the tools and all the data to help you manage your practice effectively.

That's what we're talking about with the totally integrated Advance suite.

Software, data, supplier & clients - all working together harmoniously.

For APS clients this is all part of what they have come to expect from us. Talk to one and they'll most likely tell you that we've always striven manifestly to build our suite around the individual needs of our clients. Rather than

expect you to conform to our products, we mould our software to work your way. We consistently make promises to our clients and make ourselves accountable to delivering on those promises.

APS – a supplier that's hands on & in touch with practice needs.

So, if you want to know what life's like in a world where your practice software supplier makes promises and delivers; where clients see us as having a valuable impact on their practices and teams and where those same clients regularly say 'thank you' for the help we readily offer - then we urge you to talk to us.

We believe you'll be pleasantly surprised.
